

Persistent Action Plan

Objective: Reduce Nosocomial Infections

**Cost to U.S. Health Care: *\$50 Billion annually*
*Plus 90,000 lives***

1. Germ Pro Surface Disinfectant

- Independent laboratory tested
- ***PERSISTENT***: tests show up to 28 day kill
- Kills 99.9% bacteria, virus, mold, mildew, fungi, spores
- Including *MRSA*, *VRE*, *C. Difficile*, & *C. Diff Spores*
- Spray surfaces after normal cleaning for persistent kill
- FDA & EPA and OSHA compliant

2. Germ Pro Hand Sanitizing Lotion

- Independent laboratory tested
- ***PERSISTENT***: Kills between normal hand washes
- Reapply at least every 3-4 hours or after hard scrub
- Kills 99% germs, including *MRSA*, & *VRE*
- Creates a polymeric film that is not water soluble to help protect against the harsh effects of alcohol washes.
- Vitamin E and emollients help soften and heal hands
- FDA compliant

3. Health Care Workers

- Continue to adhere to HICPAC Hand Wash Guidelines
- Persistent Action Plan, *Success relies on Health Care Workers' Support and Compliance*
